

■  $\square$  にあてはまる数を書きましょう。

$3\text{kL} = \square \text{ m}^3$

$7\text{cm}^3 = \square \text{ mL}$

$3000\text{L} = \square \text{ m}^3$

$5\text{m}^3 = \square \text{ L}$

$1000\text{L} = \square \text{ m}^3$

$8\text{m}^3 = \square \text{ L}$

$8000000\text{cm}^3 = \square \text{ m}^3$

$3000\text{cm}^3 = \square \text{ mL}$

$5\text{m}^3 = \square \text{ kL}$

$8\text{m}^3 = \square \text{ kL}$

$1000\text{mL} = \square \text{ cm}^3$

$1\text{mL} = \square \text{ cm}^3$

$9000\text{L} = \square \text{ m}^3$

$6000\text{L} = \square \text{ m}^3$

$1\text{m}^3 = \square \text{ cm}^3$

$3\text{cm}^3 = \square \text{ mL}$

$7000\text{cm}^3 = \square \text{ mL}$

$9\text{m}^3 = \square \text{ L}$

■ 次のわり算の式を分数で表しましょう。

$12 \div 5 = \text{――}$

$10 \div 7 = \text{――}$

$8 \div 7 = \text{――}$

$16 \div 11 = \text{――}$

■ わりきれるまで計算しましょう。

$59 \div 0.5$

$60 \div 0.8$

$96 \div 0.5$

$63 \div 0.2$

■ 次の平行四辺形の面積を求めましょう。
